2024-APHIS-05864-F	(b) (6)	None	I live in Minocqua Wisconsin where there is a zoo named Wildwood Wildlife Park where they abuse, neglect, and are inhumane to their animals. At the end of the year, they kill the baby bunnies with a hammer of sorts (beat them to death) which is very inhumane. They also shoot the fawns at the end of each year. If any animal acts up, like one did this past year, they kill it and then feast on that animal like they eat the fawns. At the end of each year they do a "hunt" where they go in and kill any animal of their liking and have a feast. This zoo is ZAA accredited- Zoological Association of America which after doing some research I've found that it is a made up association where zoos can ignore guidelines and treat their animals simply however. It is NOT AZA. Years ago, not sure if this is still the case, but they have had their sewer lines empty right into the Tomahawk River which connect and empties into our chain of lakes here. Not only does this zoo mistreat their animals but also pollute areas that they should not. I've sent emails complaining about this as well to PETA and am looking for guidance. I've heard many horror stories about this zoo and I want an end and I want justice and peace for these animals. Feel free to respond with any questions you may have. I'm really hopeful you guys have some ideas how we can get someone in that zoo to make sure proper protocol is met. (Date Range for Record Search: From 01/01/2022 To 07/06/2024)	07/10/2024

2024-APHIS-06103-F	Aonymous, Christine	-	Request the following; All studies in the possession/custody/control of the Animal and Plant Health Inspection Service, Department of Agriculture, authored by anyone, anywhere: 1. That scientifically prove/provide evidence of the existence of any alleged "avian influenza virus" (showing that the alleged particles exist, invade and replicate in "host" cells and cause the illness/symptoms that they are alleged to cause). Note: Scientific proof/evidence is not opinions, speculation, declarations, review papers or descriptive studies; it requires use of the scientific method to test falsifiable hypotheses through valid, rigorous, repeatable controlled experiments; 2. That describe the purification of particles that are alleged to be "avian influenza virus" directly from bodily fluid/tissue/excrement of so-called "hosts" (without adding any sources of genetic material or proteins), with purification confirmed via EM imaging (the images must be available as well). Purify = separate from everything else in the clinical sample. I am aware that according to "virus" dogma a "virus" requires host cells in order to replicate. I am not seeking records describing the replication of a "virus" without host cells or that describe a suspected "virus" floating in a vacuum or a strict fulfillment of Koch's Postulates. I am simply seeking records that describe purification (separation from everything else in the "host" sample). I am not seeking private patient records; 3. Wherein the purported "genome" of any alleged "avian influenza virus" was found intact in the bodily fluid/tissue/excrement of a "host" (as opposed to fabricated in silico, aka a computer model); and 4. That scientifically demonstrate contagion of the illness / symptoms that are allegedly caused by purported "avian influenza viruses".	07/22/2024
